OF "CALIFORNIA'S CHOICEST  
FLOWER SEEDS . . . SINCE 1890"

Bodger Seeds, Ltd.  
WHOLESALE FLOWER SEED GROWERS

LOS ANGELES COUNTY EL MONTE CALIFORNIA, U. S. A.

•

CABLE ADDRESS: Registered  
"Bodger El Monte" All Codes

Printed in U.S.A.

## Terms and General Conditions of Delivery

**A**LL SEEDS are quoted F.O.B. El Monte, California, terms 60 days net, less 2% cash 30 days. All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable. There will be no charge made for bags smaller than the one pound size (5x7½ inches).

**Prices quoted in this list go into effect immediately, superseding all previous quotations. All orders of 4 ounces or over will be charged at the pound rate; all orders under 4 ounces will be charged at the ounce rate.**

We reserve the right to change any or all prices in this list without notice.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery.

"We give no warranty, express or implied, as to the productiveness of any seeds or bulbs we sell and we will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the seed."

Should fulfillment of any order or contract be prevented or delayed by the act of God, war, blockade, revolution, prohibition of exports or imports, riots, strikes, lock outs, fire, loss and/or detention at sea or any other contingency beyond our control, we shall not be responsible for any loss and/or damage thereby.

## Shipping Information

**Domestic:** Time is important. Many of our customers use the Air Mail exclusively to save time and get the most possible out of our rapid order filling and delivery service. We suggest that you do the same. If your order is sent to us by Air Mail from the east coast it arrives the second day, is filled the same day it arrives and if shipped by Parcel Post seed will reach you within seven days from the time the order left your office. Correspondingly less time is needed when shorter distances are covered. For faster delivery, seeds shipped by Air Mail or Air Express will reach you within four days from the time your order is sent to us. For the greatest possible saving in time, send your order by wire to be shipped by air; seeds will arrive within two to three days from the time ordered.

Air express rates are calculated on the basis of half-pounds and distances are zoned. Air Mail is calculated on an ounce basis and goes as first class mail. Both speed up transportation immensely, and where time is a deciding factor, they certainly are the cheapest in the long run. Air transportation is safe, sure and economical.

## Bodger Service Department

**Novelties:** The amateur gardener is novelty conscious, and it is easy to sell a new variety. Novelties are your logical sales leaders, and it is decidedly to your own advantage to make good use of them in your newspaper publicity, your

advertising, and your counter features in the store. Make your selections from among the novelties listed herein and you cannot go wrong.

**Transparencies:** Our new colored transparencies are your busiest silent salesmen. They are accurately hand colored on translite film, printed from our regular photographic negatives. Placed in your store window, on the counter, along the walls with the seed racks, or near the cash register, they attract attention at once, and show your customer the actual flower of the seed you have for sale. Write us for full details regarding transparencies and the cabinets in which to display them.

**Kodachromes:** Our photographic department has recently assembled a very large collection of the small 35 millimeter Kodachrome slides which are available for the use of our customers for illustrating talks before garden clubs and other interested groups. If interested in the use of these Kodachrome slides, write us for full details and booking dates.

**Electros:** Believing that the day has passed when any average seedsman can afford to devote a full page or even a half page of space in his catalog to one subject, with this average seedsman in mind we have made practically all of our new electros and nickeltypes in a small size this season so that six, eight or even more subjects can be shown on a page. We believe this size, particularly in the colored electros, will prove popular with retail seedsmen. We call your particular attention to our inexpensive 1 $\frac{3}{4}$ " x 2 $\frac{1}{4}$ " color plates and to the large selection of new 1 $\frac{1}{4}$ " x 1 $\frac{1}{2}$ " black and white electros.

**All electros we send out are unmounted unless the order specifies that they be mounted. There is an additional charge of 20% for this service. Since a majority of our customers prefer unmounted electros we have followed this policy, but will be very glad to have them mounted for any who so request.**

**Photographs:** Through our Photographic Service we are able to furnish you with a complete line of first class photographs of novelty and standard flower varieties suitable for publicity and catalog purposes. Photographs will be submitted for approval upon request.

**Horticultural Colour Chart:** In certain sections of this catalog, we have added to the regular description of a variety some numbers and words in italics. These refer to color blocks in the Horticultural Colour Chart which many of our customers have secured either from us or from the Royal Horticultural Society direct. To visualize the exact color of the flower thus described, refer to your copy of the Colour Chart, turn to the page mentioned, mask the color block with the black mat provided and you will see the exact shade of the variety. For instance, Larkspur Stock Flowered Rosamond is described as *625 shaded 623*. These page numbers will be found in the upper right hand corner of each sheet in bold face type. *625* is the predominating color of the bloom with a shading of color *623*. Larkspur Stock Flowered Rose Queen, similar to Rosamond, is described as *623/1 and 623*. These two color tones will be found on page 623, block *623/1* being a slightly lighter tone of the full color *623*, both of which very similar colorings are found in this variety. We have been able to compile fairly complete color recordings of several flower varie-

ties. We believe that by this method you will be able to visualize the colors of the several varieties much more vividly than any word description can do.

**All-America Awards:** Winners in the All-America Selections Competition are designated in this list by the following symbols: (G. M.) Gold Medal; (S. M.) Silver Medal; (B. M.) Bronze Medal; and (H. M.) Honorable Mention.

All-America award winners are among the finest flower varieties. We hope you are featuring as many of these All-America winners as possible.

## ASTERS *a*

### LARGE FLOWERED, HEAVY STEMMED, SPECIAL FLORIST VARIETIES

#### EARLY GIANT WILT RESISTANT *f* (Bodger)

The finest large flowered, heavy stemmed wilt resistant Aster yet developed. Flowers are of the large Giants of California type, while the plants are less tall, about 1½' in height, with strong heavy stems. This class is early blooming, coming into flower four to six weeks earlier than the Giants of California, that is during early to mid August. An exceptional new class.

	Per oz.	Per lb.
34 <b>Light Blue</b> (Bodger) (S.M.,A.A.S.'39).....	1.30	15.00
38 <b>Peach Blossom</b> (Bodger), opens white, flushes lavender pink	1.30	15.00
30 <b>Rose Marie</b> (Bodger) (H.M.,A.A.S. '40), rich rose.....	1.70	20.00

#### SUPER GIANT *f*

This is the largest and most fully double Aster class known. The flowers are from 6" to 8" across, with full petaled, graceful, interlacing petals. Plants are about 2½' tall, with six to eight long, non-lateral stems per plant.

20 <b>El Monte</b> (Bodger) (B.M.,A.A.S.'36), crimson.....	1.30	15.00
26 <b>Los Angeles</b> (Bodger) (S.M.,A.A.S.'34), shell pink.....	1.30	15.00

#### IMPROVED GIANTS OF CALIFORNIA CURLED AND INTERLACED *f*

The flowers are large and full, of the well-known Crego type, with broad graceful petals, borne on long heavy non-lateral stems. The plants reach a height of 3', blooming from late summer until frost. A fine cut flower type for florists.

60 <b>Apple Blossom</b> , shell pink.....	1.30	15.00
68 <b>Azure Blue</b> , soft azure blue.....	1.30	15.00
80 <b>Crimson</b> (Bodger).....	1.30	15.00
44 <b>Dark Purple</b> , wilt resistant (Bodger).....	1.30	15.00
64 <b>Dark Purple</b> .....	1.30	15.00
66 <b>Deep Rose</b> .....	1.30	15.00
70 <b>Light Purple or Dark Blue</b> .....	1.30	15.00
82 <b>Loveliness</b> (Bodger), rich pure pink, touched with salmon....	1.30	15.00
72 <b>Peach Blossom</b> , opens white, flushes lavender pink.....	1.30	15.00
76 <b>White</b> , pure white.....	1.30	15.00
78 <b>Finest Mixed</b> .....	1.05	12.00

## EARLY BEAUTY WILT RESISTANT *f* (Bodger)

Planted at the same time, the Early Beauties flower with the Crego and American Branching types, or from early September until frost. The plants are from 2½'-3' tall, with long, stout stems bearing large well formed flowers. The colors are good, and the keeping qualities excellent.

	Per oz.	Per lb.
120 Azure Fairy, azure blue.....	.90	10.00
124 Crimson.....	.90	10.00
126 Deep Rose.....	.90	10.00
132 Purple or Dark Blue.....	.90	10.00
136 September Beauty, delicate shell pink.....	.90	10.00
138 White.....	.90	10.00

## ZINNIAS *a*

We have been Zinnia specialists for many years, taking the lead in their development ever since our first outstanding Zinnia introduction, the Dahlia Flowered strain, which was rightly named a New Flower for the People. This type, developed in our experimental department and introduced by us in 1919, was the turning point which changed completely the status of the once unpopular Zinnia family. Since this time, we have developed and introduced many new types and varieties in the now extremely popular Zinnia group. Many additional varieties are in the process of development in our Zinnia workshop and will be presented within the course of the next few years. See our Bulletin No. 1, The Zinnia and its Uses, for full details on Zinnia Types and Culture.

## TALL, LARGE FLOWERED TYPES

### BODGER'S GOLD MEDAL DAHLIA FLOWERED *f* (Bodger) (G.M., R.H.S. '24)

The Dahlia Flowered strain was introduced by us in 1919, and all the colors have been of our introduction at various times since then.

The plants are of medium height, 2½'-3', very robust, bearing many strong stems of the fully double, huge flowers which resemble the show type of Dahlia. We have marked the most popular varieties with an asterisk (\*).

1260 *Canary Bird, rich canary yellow.....	.45	5.00
1262 *Crimson Monarch, deep crimson, flowers very large.....	.45	5.00
1264 *Dream, deep rosy lavender.....	.45	5.00
1266 Eldorado, salmon apricot.....	.45	5.00
1268 *Exquisite, light rose, deep rose center.....	.45	5.00
1272 *Golden Dawn, golden yellow.....	.45	5.00
1274 Golden State, golden-orange in the bud, turning to orange.....	.45	5.00
1276 *Illumination, deep rose self.....	.45	5.00
1280 Luminosa, bright pink.....	.45	5.00
1282 Meteor, rich, deep red, darkest of all the reds.....	.45	5.00
1286 Old Rose, old rose shades.....	.45	5.00
1288 *Oriole, orange and gold.....	.45	5.00
1290 *Polar Bear, large white.....	.45	5.00
1292 Purple Prince, deep purple.....	.45	5.00
1298 Royal Purple (H.M., A.A.S. '42), rich purple.....	.45	5.00
1294 Scarlet Flame, bright scarlet.....	.45	5.00
1258 *Will Rogers (Bodger), lovely brilliant deep scarlet.....	.45	5.00
1306 Gold Medal Finest Mixed, grown as separate colors.....	.40	4.50

## **BODGER'S CALIFORNIA GIANT or MAMMOTH *f* (Bodger)**

Introduced by us in 1926, this type has rapidly gained in popularity. The plants are taller than the Dahlia Flowered type, 3'-4', with long stems which adapt it particularly for use as a cut flower. The flowers are very large and flat, giving a graceful effect.

	Per oz.	Per lb.
1350 Brightness, bright pink.....	.45	5.00
1352 Cerise Queen, beautiful cherry rose.....	.45	5.00

## DAISY SHASTA (See Chrysanthemum)

### DELPHINIUM PACIFIC GIANTS *pf* (Vetterle and Reinelt)

Remarkable new strain developed by Vetterle and Reinelt on the Pacific Coast. Flowers extremely large and well formed, 2½" to 3½" in diameter, symmetrically spaced on well balanced spikes of thin woody stems, practically 100 per cent double. This strain is comparatively mildew resistant. Seed we have to offer is of our own growing produced from the originator's stock seed.

### PACIFIC GIANTS GROWN FROM ORIGINATOR'S STOCK

4420	Hybrida Mixed.....	.65	7.00
4422	Dwarf Hybrids Mixed.....	.90	10.00

### **LARKSPUR GIANT IMPERIAL *af***

Tall, upright, compact, basal branching in habit, the Giant Imperials have superseded all other types of Larkspurs for florists' and general garden use. The delphinium like spikes of double flowers, carried on stems 4'-5' long, are compactly placed on the upright growing plants, requiring only about one-half the space needed for the old stock flowered type of Larkspur.

MAMMOTH DOUBLE EARLY BRANCHING NICE *af*

Coming into flower just as early as the Dwarf Ten Week varieties, and forming plants pyramidal in shape. This is the most popular class for general use. Height 18".

6638	Finest Mixed.....	.90	10.00
------	-------------------	-----	-------

DOUBLE EARLY GIANT IMPERIAL (Improved Bismarck) *af*

Of branching habit, the large flowers and long stems of this class make it especially desirable for cutting. Very early blooming and produces a high percentage of doubles. Height 26".

6688	Finest Mixed.....	1.30	15.00
6690	Good Mixed.....	.90	10.00

DOUBLE GIANT COLUMN (Improved Excelsior) *af*

Immense fully double close spaced flowers, one 2'-2½' spike per plant. This strictly non-branching strain is in very great demand by florists.

6816	<b>Gardenia</b> (Bodger), huge, glistening white.....	6.80	80.00
6802	Silvery Lilac (Lilac Lavender) 63½/2.....	5.00	60.00
6814	Yellow Wonder, deep creamy yellow.....	5.00	60.00

SUMMER CYPRESS (See Kochia)

SUNFLOWER (See Helianthus)

Symbols used:

*a*—annual  
*b*—biennial  
*c*—climber  
*f*—cut flower variety, special for florists

*gr*—greenhouse plant  
*p*—perennial  
*ra*—rock plant annual  
*rp*—rock plant perennial

## BRIEF CULTURAL NOTES

**ZINNIAS:** Zinnias are warm weather loving plants and should never be sown until the soil has thoroughly warmed up and all danger of any frost has passed. For best results, especially with the smaller flowered, early blooming varieties, we recommend sowing the seed where the plants are to flower. The taller growing, large flowered sorts can safely be transplanted, although they also will make a more robust growth and will produce more flowers if they can be sown where the plants are to bloom, and then when the seedlings are 3" or 4" tall, thinned to the proper distance. To induce a thrifty, heavy root system, irrigate your plants rather than sprinkling. Dig a little trench alongside the row and let the water run slowly for several hours so it will seep down deep into the ground and make the food in the soil available for the plant throughout the mass of feeding roots. Always cultivate after each irrigation to conserve moisture. By this method you will have to water Zinnias only once every two weeks or so, whereas if the ground is merely sprinkled, you will have to repeat the sprinkling every other day or so. Irrigation not only gives a stronger, healthier plant, but also saves on your water bill.

**CALENDULAS:** Calendulas are definitely cool weather loving plants and in the warmer climates should be sown in the autumn for early bloom in the late winter or early spring. While they like full sun, they cannot stand the burning sun of summer. In colder climates, seed should be started in the cold frame and plants set out as soon as possible for late spring and early summer bloom. In planting Calendulas, be sure and choose the proper type for the use you have in mind. There are forcing varieties for greenhouse growing and garden varieties for outdoor growing. The outdoor varieties make a sturdier, more compact growth and are very desirable for garden use, while the forcing varieties are developed especially for the cut flower trade and do best under greenhouse conditions.

**GODETIAS:** In their native California, the Godetia seeds on the hillsides sprout with the first winter rains and grow during the cool, wet winter months and come into flower during late spring, hence their name, Farewell-to-Spring. Given similar treatment in the garden, they will give their best bloom. Sow the seed broadcast late in the fall and allow them to remain undisturbed during the winter months. In the spring they will grow quickly as the soil warms and bloom profusely during late spring. Best results will be obtained by this method as they cannot tolerate the very strong summer sun.

**GOURDS:** Gourds should be sown where the plants are to remain and should not be planted until late in the spring after the soil is thoroughly warm and nights as well as days are warm. For best results sow in a warm, sandy location, somewhat on the dry side. Provide enough water for a normal growth until the flowers appear, after which no further irrigation should be necessary. Watering during the flowering period will cause dropping of flowers and buds, and consequent loss of Gourds. For perfect-shape specimens, vines should be trained up on a fence or trellis and the Gourds allowed to hang, thus assuring straight necks and preventing rotting or discoloration from the soil. Do not harvest the Gourd crop until the fruits are thoroughly matured. This will be when the stem becomes brown and hard and pressure with the fingernail cannot dent the shell of the Gourd. After picking, Gourds should be hung in an airy, dry place until thoroughly cured. The large, hard-shelled varieties are then washed and scrubbed before decorating. The small, colorful varieties are wiped clean of dust and given a light coating of varnish or shellac. If thoroughly dried before treatment, Gourds should last several months for house decoration.

**IPOMEAS:** In growing Ipomeas, never plant until the soil is thoroughly warm. If it is too cool, the seeds will rot instead of germinating. Even in such warm sections as Southern California, seed should not be sown until late May. To aid germination of particularly hard-seeded varieties, filing a small notch at the top of the seed will help considerably. Always select the driest, sandiest part of the garden and sow where the plants are to flower as the Ipomeas resent transplanting. Plants should be kept on the dry side in order to induce early and abundant flowering with a rather sparse growth of foliage. Heavy watering will stimulate foliage growth at the expense of flowers. A poor soil is preferable to a rich one and fertilizer should not be used as this will promote heavy foliage which will hide the flowers. Ipomeas show off to best advantage when planted against a wall, fence or trellis.

## BRIEF CULTURAL NOTES (Continued)

**LARKSPURS:** Larkspurs are cool weather plants and for best results should be sown in the fall. In warm sections, such as Southern California, they are sown as early as August, broadcast where they are to bloom and if for the cut flower market, are sown thick like radishes and the entire plant pulled to go to market. For the home garden, on the other hand, plants are thinned out to the proper distance and allowed to branch normally for a more brilliant show of color. In the colder sections, seed should be sown broadcast in November in its permanent position in the garden. If very severe, a light mulch covering should be applied. Seed will, therefore, remain stratified and dormant throughout the winter months and with the spring thaws and first warmth will germinate and commence to grow. As Larkspur seed requires a chilling for best germination, this is the ideal treatment for best results.

**MARIGOLDS:** The African Marigolds are strong feeders requiring plenty of water. This type should therefore be planted in the richest, most favorable section of the garden. Seed may either be sown where the plants are to flower or can be started early in a seed bed and the seedlings set out to their permanent position later on. They transplant very readily. French Marigolds on the other hand are very light feeders and require a very small quantity of water. Too strong feeding and too heavy watering will throw them into foliage growth with a great scarcity of flowers. For a free-flowering, colorful plant, select the poorest soil, keep the plants on the dry side and do not fertilize. Seed may be sown where the plants are to flower or seedlings can be transplanted from the seed bed although better results will probably be obtained by sowing in place. Marigolds are fairly hardy and should be started early in the spring.

**PETUNIAS:** The chief pitfall the amateur runs up against in growing Petunias is in the seed sowing. Almost invariably they bury the tiny seeds so deeply that the sprouting seedlings cannot possibly fight their way to the surface. Petunia seed must be sown with the very utmost carefulness. A seed flat or a seed pan should be used, a light, loamy soil carefully prepared, properly moistened and finely screened, the box filled to within a half-inch of the top with ample drainage on the bottom and tamped down firmly, smoothly and evenly. Then the seed should be mixed with about a teaspoonful of sand and this mixture of seed and sand sprinkled carefully and thinly over the surface of the seed box. A very fine sprinkling of pure sand, not more than  $\frac{1}{8}$  of an inch, may be used on top of this mixture or it may be left without any further covering. A pane of glass or a damp burlap sack or folded newspapers should then be placed over the flat and left there until the seeds begin to sprout. Immediately after the first sprout appears, this heavy shading must be removed and a single layer of gauze substituted. If the soil has been properly moistened when it is being prepared for sowing, it will not have to be watered again until the seedlings have developed their third and fourth leaves. If the soil appears to be drying out, however, water is to be applied with a very fine-spray hand bulb, or better still, the pan or flat placed in a tray of water to allow moisture to soak upwards from the bottom. Always leave the seed box in a well-ventilated place, but without any draft, to prevent damping off. When the seedlings are large enough to handle, they should be pricked off into a second flat or small pots for a few weeks before setting out in their permanent position in the garden.

**SCABIOSAS:** While the annual Scabiosas will bloom during the summer, they do so much better in the early spring than during the hot summer days, that every effort should be made to start the seed in the early fall in warm sections or in cold frames in early spring in the more northerly sections. In warm sections, such as Southern California, plants will winter over perfectly well and produce extremely early flowers the second year. Scabiosas enjoy full sun and will thrive in any good garden soil.

## APPROXIMATE NUMBER OF SEEDS PER OUNCE

Abronia .....	2,300
Acroclinium .....	9,000
Ageratum Dwarf .....	214,000
Alyssum .....	60,000
Amaranthus .....	30,000
Anagallis .....	41,900
Anchusa Italica .....	1,200
Anemone .....	40,100
Antirrhinum .....	220,000
Aquilegia Longissima .....	17,500
Arctotis Hybrids Autumn Shades.....	9,000
Armeria Large Flowered Hybrids.....	12,000
Aster Varieties .....	12,000
Aster Wilt Resistant Early Giant Rose Marie.....	12,000
Aubrietia .....	85,000
Balloon Vine .....	400
Balsam Bush Flowered Torch.....	2,400
Bartonia .....	38,000
Bellis Perennis .....	192,000
Bidens .....	29,600
Brachycome .....	150,000
Calendula Campfire Bodger's Improved Fl. Strain.....	5,200
Calendula Chrysantha .....	4,000
Calliopsis .....	100,000
Campanula Medium .....	125,000
Candytuft .....	10,000
Canna .....	100
Carnation Chabaud's .....	15,000
Celosia .....	30,000
Centaurea Cyanus .....	7,000
Centaurea Gymnocarpa .....	7,500
Centaurea Imperialis .....	8,000
Centaurea Moschata .....	10,500
Cheiranthus .....	20,000
Chrysanthemum Annual .....	10,000
Clarkia .....	100,000
Cleome .....	13,800
Coix .....	120
Coreopsis .....	12,000
Cosmidium .....	12,900
Cosmos .....	5,500
Cosmos Klondyke Orange Flare.....	3,000
Cuphea Firefly .....	7,200

Zinnia Pumila .....	4,500
Zinnia Scabious Flowered.....	6,000
Zinnia Super Crown O'Gold Pastel Tints.....	2,800

## SPECIAL USES OF FLOWERS

### FOR CUT FLOWERS

Acroclinium	Clarkia	Nigella
Agrostemma	Coreopsis	Pentstemon
Anchusa	Dianthus	Petunia
Antirrhinum	Didiscus	Phlox
Arctotis	Gaillardia	Poppy Nudicaule
Aster	Gerbera	Pyrethrum Roseum
Brachycome	Gomphrena	Rudbeckia
Cacalia	Gypsophila	Salpiglossis
Calendula	Helichrysum	Scabiosa
Calliopsis	Larkspur	Schizanthus
Candytuft	Marigold	Stocks
Carnation	Mignonette	Sweet Peas
Centaurea	Nasturtium (Gleam)	Verbena
Chrysanthemum		Zinnia

### ANNUALS THAT DO WELL IN A SLIGHTLY MOIST SOIL

Amaranthus	Linum	Mignonette
Calendula	Marigold	Nigella
Larkspur	Marvel of Peru	Ricinus

### ANNUALS WHICH WITHSTAND DROUGHT

Abronia	Coreopsis	Marvel of Peru
Ageratum	Cosmos	Mesembryanthemum
Alyssum	Cynoglossum	Petunia
Arctotis	Dianthus	Portulaca
Bartonia	Dimorphotheca	Scabiosa
Brachycome	Euphorbia	Statice
Browallia	Gaillardia	Tithonia
Calliopsis	Helianthus	Verbena
Candytuft	Hollyhock	Vinca
Centaurea	Humulus	Zinnia
Chorizanthe	Marigold	

### PLANTS FOR HANGING BASKETS, ETC.

Abronia	Geranium	Nasturtium (Gleam)
Ageratum	Ipomea	Petunia
Asparagus sprengeri	Lantana	Portulaca
Begonia	Lobelia	Thunbergia
Coleus		Verbena

### FLOWERS FOR WINTER BOUQUETS (DRIED FLOWERS)

Acroclinium	Gypsophila paniculata	Physalis
Catananche	Helichrysum	Rhodanthe
Celosia Cristata	Lunaria	Statice
Gomphrena		Xeranthemum

### DWARF EDGING PLANTS

Ageratum	Gazania	Pansy
Alyssum	Lobelia	Portulaca
Arabis	Marigold (French)	Pyrethrum aureum
Armeria	Marigold (Signata Pumila)	Verbena compacta
Aubrietia	Myosotis	Viola
Bellis	Nasturtium (Dwarf)	Virginian Stock
Campanula carpatia	Nemesia	Zinnia Tom Thumb
	Nemophila	

## SPECIAL USES OF FLOWERS

### RAPID GROWING ANNUAL VINES

Balloon Vine	Cypress Vine	Nasturtium (Tall)
Balsam Apple and Pear	Dolichos	Scarlet Runner Beans
Canary Bird Vine	Gourds	Sweet Peas
Cardinal Climber	Ipomea	Wild Cucumber
Cobea	Morning Glory	

### ANNUALS FOR FRAGRANCE

Abronia	Matthiola	Stocks
Alyssum	Mignonette	Sweet Peas
Candytuft	Nasturtium (Gleam)	Sweet William
Carnation	Nicotiana	Valeriana
Centaurea imperialis	Petunia	Wallflower
Heliotrope	Scabiosa	

### ANNUALS FOR POOR SOIL

Alyssum	Cosmos	Nasturtium
Antirrhinum	Euphorbia	Portulaca
Carthamus	Godetia	Statice
Celosia	Kochia	Ursinia
Chorizanthe	Mesembryanthemum	Venidium
Clarkia		Verbena

### ANNUALS WHICH PREFER A LIME SOIL

Amaranthus	Hunnemannia	Stocks
Dianthus	Mignonette	Wallflower
	Momordica	

### FOR SEMI SHADE

Anchusa italica	Clarkia	Lupin
Aquilegia	Coleus	Myosotis
Bellis perennis	Geum	Pansy
Campanula	Godetia	Platycodon
Centaurea	Linaria	Sweet William

### FOR ROCK GARDENS

#### Annuals

Abronia	Lobelia	Schizanthus
Alyssum	Marigold Tagetes	Statice Tom Thumb
Anagallis	Mesembryanthemum	Sweet Pea Cupid
Brachycome	Nasturtium Dwarf Gem	Thunbergia
Chorizanthe	Nemesia	Torenia
Dianthus Heddewigi	Nemophila	Ursinia
Dimorphotheca	Phlox drummondii	Verbena
Gilia Micrantha	Portulaca	Virginian Stock
Leptosyne	Sanvitalia	Zinnia Tom Thumb
Linaria	Saponaria	Zinnia Haagaena
	Scabiosa Tom Thumb	

### FOR ROCK GARDENS

#### Perennials

Alyssum saxatile	Dianthus	Platycodon
Anthemis Montana	Fragaria	Poppy Nudicaule
Aquilegia	Geum	Potentilla
Arabis	Gypsophila Repens	Primula
Arenaria	Helianthemum	Saponaria Ocymoides
Armeria	Heuchera	Silene Schafta
Aubrietia	Hypericum	Stachys Lanata
Bellis perennis	Linum	Statice Dumosa
Campanula carpatia	Lychnis	Tunica
Candytuft Semperflorens	Matricaria Eximia	Verbascum Wied.
Cerastium	Myosotis	Verbena Venosa
Cheiranthus	Nepeta	Veronica
Convolvulus mauritanicus	Oenothera macrocarpa	Viola
		Vittadenia
